## QUALIFIER

THP-EX3

The PatioEx is an inflatable patio that rests on the deck of a ramp-door located at the rear of a 5th wheel toyhauler. It is secured to the deck via two corner straps and three adjustable undermount straps. Magnets are used to join the open end of the patio to the metal ramp-door frame.

**Patio:** 84"W x 91"L x 92"H

**Area within pillars:** 82"D x 71"W

**Min. Ramp Door Dimensions:**

92" from face of the ramp door  
frame to inside of patio gate

83"W inside patio gate

## BEFORE YOU BEGIN

Please note these compatibility limitations:

The PatioEx is designed for use on a Toyhauler 5th wheel with a rear ramp door, supported by undermount legs and a deck large enough to accommodate the patio dimensions.

The PatioEx is **not** compatible with units that have aluminum garage door frames or angled patio rail corners.

The PatioEx is **not** designed to be a permanent year-round living space, but rather a temporary inflatable addition to enhance the users' outside patio experience.

A patio railing system is **required** to use the PatioEx.

The PatioEx does **not** fit properly on travel trailer toyhauler doors unless they meet the dimensions listed.

The PatioEx will **not** work with three season doors that swing outward toward the ramp door, as this will interfere with the top of the PatioEx.

Above. Beyond. Always.
