

INDEPENDENT SUSPENSION SYSTEM

INDEPENDENT SUSPENSION

The independent design of the MORyde I.S. system allows each wheel to respond individually to the road. That means your unit glides easily over uneven and rough roads to give you the comfortable ride you deserve.

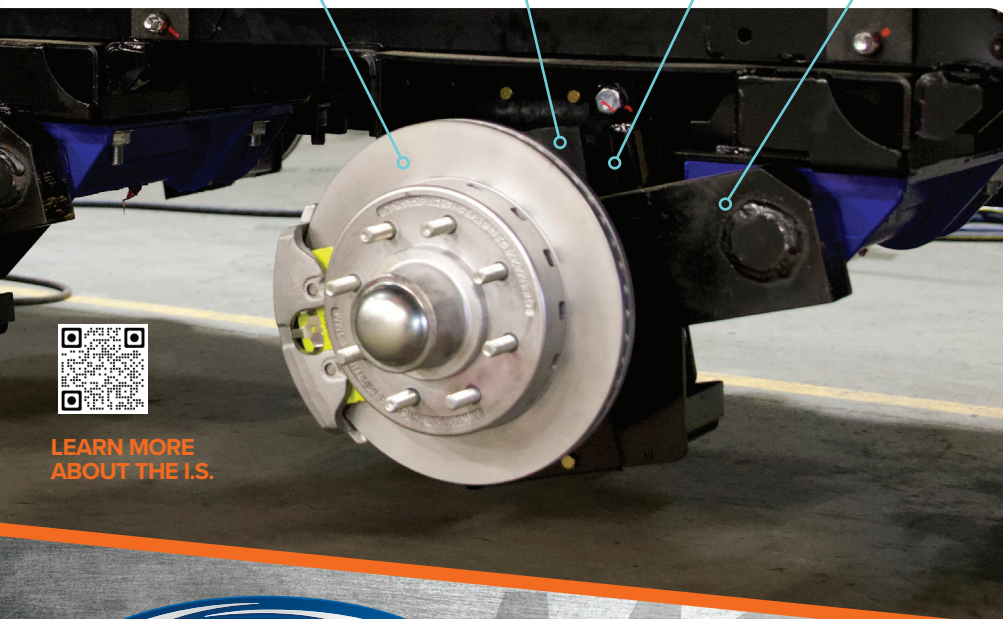

FEATURES

- Provides up to 5.5" of suspension travel
- Much smoother towing than conventional leaf springs
- Better protection of the trailer from rough roads
- Far more durable than leaf spring suspension systems
- 5-year warranty

NOTE: While the Independent Suspension 2.0 system is designed to be bolt-on installation, there may be cases in which welding is required.

Call **574-293-1581** or email us at Parts@MORyde.com to schedule your installation appointment.

Independent Suspension Shock Absorber Kit

Many Independent Suspension Systems come standard with shock absorbers. If yours does not – or if you're replacing worn shocks – this kit is the right solution.

Includes:

- (2) Loop Shock Absorbers
- (4) Mounting Bolts
- (2) Mounting Nuts

IS12-068

Please note: Sold per axle. Order two kits for tandem

Above. Beyond. Always.

INDEPENDENT SUSPENSION

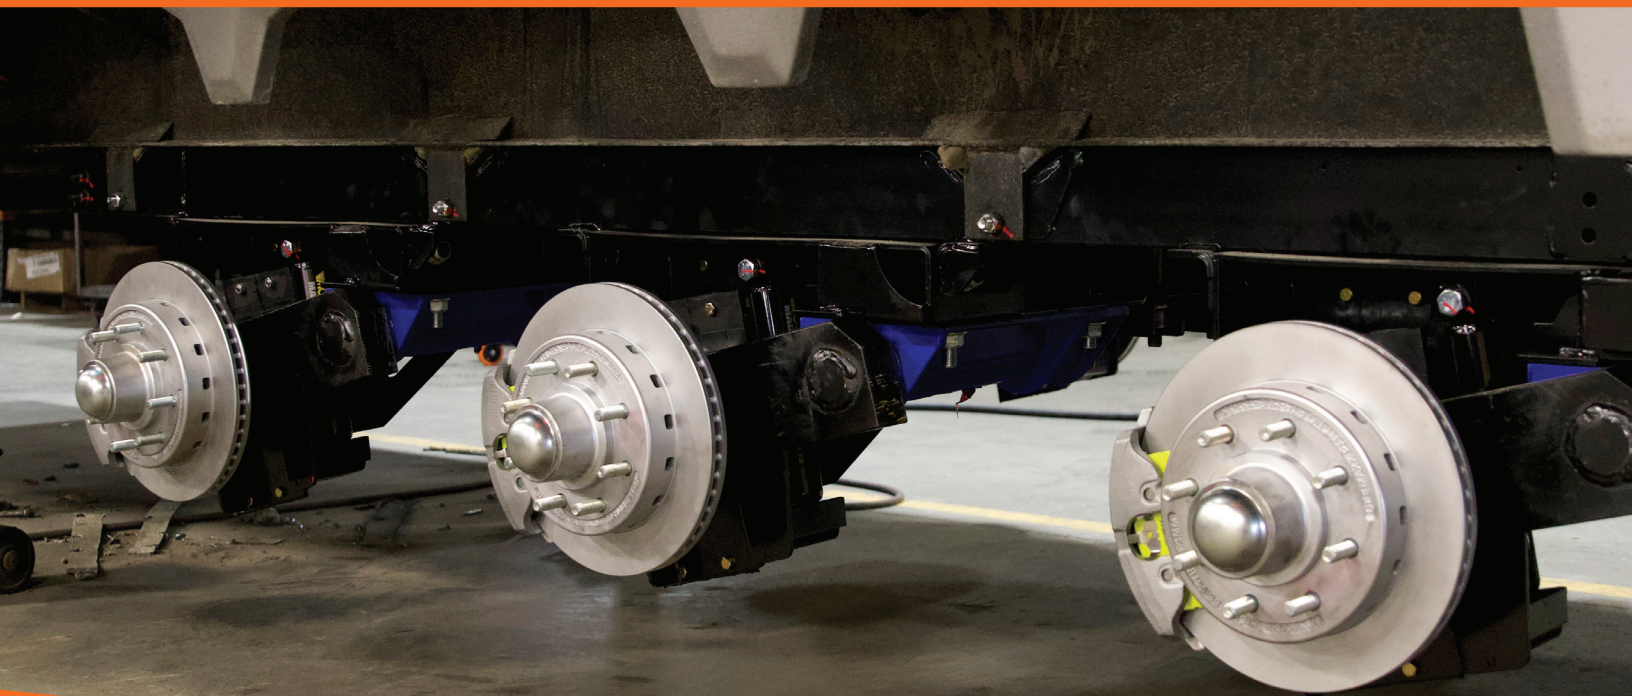

SYSTEM
